

Gamme de Switches HP 2530

Caractéristiques

- Commutateurs de niveau 2 entièrement managés, fiables, sécurisés et à un prix très avantageux
- 8 , 24 ou 48 ports Gigabit ou Fast Ethernet et 4 ports Gigabit pour liaisons montantes (2 liaisons montantes pour les modèles 8 ports)
- Modèles PoE+ pour la voix, la vidéo et les déploiements sans-fil
- Prise en charge de WDRR, de listes de contrôle d'accès et d'hôtes IPv4/IPv6
- Inclus la garantie à vie, toutes les versions logicielles et le support technique par téléphone

Aperçu du produit

La gamme de commutateurs HP 2530 est composée de douze commutateurs de périphérie de niveau 2 entièrement administrables et offre une connectivité fiable, sécurisée à un prix très avantageux pour les réseaux d'entreprise. Conçus pour les réseaux d'entreprise de taille petite à moyenne, ces commutateurs Gigabit Ethernet et Fast Ethernet fournissent des toutes les fonctionnalités de niveau 2 nécessaires telles que l'accès sécurisé, la priorisation du trafic, la prise en charge d'hôte IPv6, le PoE+ (sur certains modèles) et incluent la garantie à vie.

Les modèles 24 et 48 ports de la gamme de switches HP 2530 possèdent quatre liaisons montantes Gigabit Ethernet. Les commutateurs Fast Ethernet 2530 24 et 48 ports possèdent quatre emplacements SFP pour une connectivité fibre. Le modèle de switch 8 ports compact et sans ventilateur offre une flexibilité additionnelle avec deux ports double personnalité qui peuvent être utilisés soit comme ports RJ-45 Gigabit ou SFP. Pour les clients utilisant le Power over Ethernet pour la voix, la vidéo ou les déploiements sans-fil, les commutateurs HP 2530 PoE+ sont IEEE 802.3af et IEEE 802.3at offrant jusqu'à 30 W par port.

La gamme de commutateur HP 2530 est facile à utiliser, à déployer et à administrer via SNMP, CLI, ou une interface web graphique. La gamme comprend différents kits de montage flexibles : mur, table et rack ; un fonctionnement silencieux; une plus grande économie d'énergie avec des fonctionnalités comme IEEE 802.3 az (Energy Efficient Ethernet). Ces commutateurs sont garantis à vie et incluent toutes les mises à jour logicielles et le support technique par téléphone.

Fonctions et avantages

Qualité de Service (QoS)

• Priorisation du trafic (IEEE 802.1p)

Autorise une classification en temps réel du trafic avec un support pour huit niveaux de priorité affectés à deux ou quatre queues ; utilise WDRR ou la stricte priorité SP

• Configuration QoS simplifiée

– Port-based

Détermine la priorité du trafic en spécifiant un port et son niveau de priorité

– VLAN-based

Détermine la priorité du trafic en spécifiant un VLAN et un niveau de priorité

• Classe de Service (CoS)

Définit un niveau de priorité IEEE 802.1p basé sur l'adresse IP, le type de service IP (ToS), un protocole de niveau 3, le numéro de port TCP/UDP, le port source et DiffServ

• Limitation de débits

Fixe le débit maximal en entrée par port pour tout le trafic entrant, ou pour le trafic de broadcast, multicast, ou unicast à destination inconnue

• Priorisation de niveau 4

Permet la priorisation en se basant sur le numéro de port TCP/UDP

• Contrôle du flux

Aide à fournir une communication fiable pendant un fonctionnement en full-duplex

Gestion

• Choix des interfaces de gestion

– Interface graphique web utilisateur (GUI)

L'interface graphique facile d'utilisation basée sur l'HTML permet une configuration du commutateur de n'importe quel navigateur web

– Ligne de commande (CLI)

Interface robuste en ligne de commandes qui fournit une configuration et un diagnostic avancés

– Simple Network Management Protocol (SNMPv1/v2c/v3)

Autorise un commutateur à être géré par une variété d'applications tierces de gestion et supervision réseau

• Stacking virtuel

Gestion d'un maximum de 16 commutateurs via une adresse IP unique

• sFlow (RFC 3176)

Comptabilité et surveillance du trafic à vitesse filaire configurées par SNMP et CLI avec trois récepteurs terminaux cryptés

Surveillance et statistique sur le trafic à vitesse filaire, et envoie des données de manière chiffrée vers trois collecteurs.

• IEEE 802.1AB Link Layer Discovery Protocol (LLDP)

Automatise la découverte des appareils connectés au commutateur pour aider les stations de supervision à cartographier ce dernier

• Journal d'évènement

Suivi des événements locaux ou à distance via SNMP (v2c et v3) et

syslog ; permet un filtrage des événements pour réduire le nombre d'entrées générées

• Port mirroring

Permet au trafic d'être reflété sur n'importe quel port ou analyseur de réseau pour aider à diagnostiquer et détecter les attaques réseau

• RMON (remote monitoring)

Fournit des capacités de surveillance du trafic et de reporting avancés pour les statistiques, l'historique, les alertes et événements

• Trouve-Répare-et-Informe

Trouve et résout automatiquement les problèmes réseau et en informe ensuite l'administrateur

• Nommage personnalité des ports

Permet la désignation de noms descriptifs pour les ports

• Double image logicielle

Elles fournissent des fichiers indépendants primaires et secondaires du système d'exploitation pour une plus grande sécurité lors de la mise à jour

• Multiple fichiers de configuration

Permet à de multiples fichiers de configuration d'être stockés dans la mémoire flash

Témoins en face avant

– Localisateur LED

Permet aux utilisateurs d'allumer le localisateur LED sur un commutateur spécifique, le faire clignoter ou l'éteindre ; cela simplifie la résolution des problèmes en facilitant la localisation d'un commutateur particulier au sein d'un rack de commutateurs similaires

– Per-port LEDs

Fournit une vue d'ensemble du statut, de l'activité, la vitesse et le fonctionnement en full-duplex

– Power and fault LEDs

Révèle n'importe quel problème

Connectivité

• IPv6

– Hôte IPv6

Permet au commutateur d'être déployé et géré à la périphérie d'un réseau IPv6

– Dual stack (IPv4/IPv6)

Soutien la connectivité pour différents protocoles ; fournit un mécanisme de transition de IPv4 vers IPv6

– MLD snooping

Transfère le trafic multicast IPv6 à l'interface appropriée ; Évite au trafic multicast IPv6 d'inonder le réseau

• IEEE 802.3af Power over Ethernet (PoE)

Fournit jusqu'à 15.4 W par port aux appareils conformes à la norme PoE IEEE 802.3af comme les téléphones IP, les bornes wifi, et les caméras de sécurité

• IEEE 802.3at Power over Ethernet Plus

Fournit jusqu'à 30 W par port aux appareils conformes à la norme PoE+ IEEE 802.3 comme les téléphones IP, les bornes wifi IEEE 802.11n, et les camera de sécurité PTZ (voir les spécifications produits pour l'alimentation PoE disponible)

- **Auto-MDIX**

Il ajuste automatiquement les câbles droits ou croisés sur chaque port

- **Support pour norme antérieure à PoE**

Déetecte et fournit de l'énergie aux appareils ayant une norme antérieure à PoE ; voir liste des appareils supportés dans la catégorie FAQ produit sur www.hp.com/networking/support

- **Emplacements SFP**

Fournit une connectivité fibre telle que Gigabit-SX, -LX, -LH et -BX avec quatre emplacements SFP sur les modèles 24 et 48 ports. Les modèles 24 et 48 ports Fast Ethernet ont deux emplacements SFP et deux liaisons montantes Gigabit RJ-45. Le modèle 8 ports possède deux ports double personnalité supportant à la fois les liaisons montantes Gigabit SFP ou RJ-45.

- **Port console série double personnalité (RJ-45 ou micro USB-B)**

Donne un accès simplifié à la CLI du commutateur via le port console série double personnalité RJ-45 ou micro USB-B

Commutateur niveau 2

- **VLANs**

Fournit un support pour 512 VLANs et 4094 IDs VLAN

- **Support des trames Jumbo**

Supporte des trames jusqu'à 9220-bytes pour améliorer la performance des transferts de données importantes. Les modèles 8 et 24 ports Fast Ethernet supportent automatiquement jusqu'à 2000 bytes sans avoir besoin de changer les configurations.

- **Table de 16000 adresses MAC**

Fournit un accès à de nombreux appareils de niveau 2

- **Protocole d'enregistrement GARP VLAN**

Permet un apprentissage automatique et une désignation dynamique des VLANs

Sécurité

- **Listes de contrôle d'accès (ACLs)**

Applicables aux ports IPv4/IPv6 et aux le VLAN*.IPv6 ACL est supporté par les modèles Gigabit et 48 ports uniquement.

- **Source-port filtering**

Autorise uniquement certains ports particuliers à communiquer entre eux

- **RADIUS/TACACS+**

Facilite l'administration de la sécurité des switches en utilisant un serveur d'authentification pour la gestion des mots de passe

- **Secure Sockets Layer (SSL)**

Crypte le trafic HTTP, autorisant un accès sécurisé à l'interface graphique de gestion du commutateur

- **Sécurité des ports**

Autorise l'accès à seulement quelques adresses MAC qui peuvent être mémorisées dynamiquement ou spécifiées par l'administrateur

- **MAC address lockout**

Empêche les adresses MAC préconfigurées de se connecter au réseau

- **Plusieurs méthodes d'authentification d'utilisateurs**

- **IEEE 802.1X**

Méthode standard de l'industrie d'identification des utilisateurs utilisant un client IEEE 802.1X en combinaison avec un serveur RADIUS

- **Authentification basée sur le web**

Identique à IEEE 802.1X et fournit un environnement basé sur un navigateur pour identifier les clients qui ne sont pas compatibles à la norme IEEE 802.1X

- **Authentification basée sur MAC**

Authentifie le client par son adresse MAC via un serveur RADIUS

- **Sécur Shell (SSHv2; client et serveur)**

Il crypte toutes les données transmises pour un CLI sécurisé et distant pour tous les réseaux IP

- **Sécur Shell Cela fait double emploi avec la précédente**

Il crypte toutes les données transmises pour un CLI sécurisé et distant pour tous les réseaux IP

- **Protection STP BPDU port**

Bloque les Bridge Protocol Data Units (BPDUs) aux ports qui n'en ont pas besoin, évite les attaques basées sur ces messages

- **STP Root Guard**

Protège le "root bridge" des attaques ou des erreurs de configuration

- **Accès sécurisé à l'interface de configuration**

Crypté de façon sécurisée toutes les méthodes d'accès (CLI, GUI, ou MIB) grâce à SSHv2 et SNMPv3

- **Bannière personnalisée**

Affiche la politique de sécurité lorsqu'un utilisateur se connecte au commutateur

- **Secure FTP**

Permet le transfert sécurisé des fichiers vers et du commutateur ; protège contre le téléchargement non voulu de fichiers ou de la copie non autorisée d'un fichier de configuration d'un commutateur

- **Protected ports CLI**

Offre une CLI intuitive pour configurer les caractéristiques des filtres du port source en autorisant les ports spécifiques à être isolé des autres ports du commutateur ; le ou les ports protégés peuvent communiquer uniquement avec le lien montant ou les ressources partagées

- **Flexibilité de l'authentification**

- **Multiple utilisateurs IEEE 802.1X par port**

Fournit une authentification jusqu'à huit utilisateurs IEEE 802.1X par port ; évite aux utilisateurs le "piggybacking" sur l'authentification 802.1X d'un autre utilisateur

- **Authentification par port simultanée IEEE 802.1X et Web ou MAC**

Les ports du commutateur accepteront les authentifications IEEE 802.1X et Web ou MAC

- **Sécurité de connexion à la gestion du commutateur**

Aide à sécuriser la connexion CLI du commutateur en exigeant une authentification RADIUS ou TACACS+

Convergence

- **LLDP-MED (Media Endpoint Discovery)**

Est une extension de LLDP qui stocke les valeurs pour les paramètres comme la QoS et VLAN pour configurer automatiquement les appareils réseaux comme les téléphones IP

- **IP multicast (data-driven IGMP)**

Évite automatiquement l'inondation du trafic multicast IP

• IEEE 802.1AB Link Layer Discovery Protocol (LLDP)

Est un protocole de détection automatique des appareils qui facilite la cartographie pour des applications de gestion réseau

• Allocations PoE et PoE+

Supporte différentes méthodes (automatique, IEEE 802.3at dynamique, LLDP-MED fine grain, IEEE 802.3af device class, ou spécifique utilisateur) pour distribuer et gérer l'alimentation PoE/PoE+ pour plus d'économie d'énergie

• Voix VLAN

Utilise le LLDP-MED pour configurer automatiquement un VLAN pour les téléphones IP

• IP multicast (data-driven IGMPv3)

Évite automatiquement l'inondation de trafic IP multicast

Résilience et haute disponibilité

• Port trunking and agrégation de liens

– Trunking

Supporte jusqu'à huit liens par trunk pour augmenter la bande passante et créer des connexions redondantes ; supporte l'algorithme trunk-load-balancing L2, L3, et L4*. Le trunk-load-balancing L4 est supporté par les modèles Gigabit et 48 ports uniquement

– IEEE 802.3ad Link Aggregation Protocol (LACP)

Facilite la configuration de trunks grâce à la configuration automatique

• IEEE 802.1s Multiple Spanning Tree

Fournit une haute disponibilité des liens dans des environnements VLAN multiples en autorisant les spanning trees multiples; fournit un soutien traditionnel pour le IEEE 802.1d et IEEE 802.1w

Architecture produit

• Conception basse consommation

– IEEE 802.3az

Réduit la consommation d'énergie durant les périodes de faible activité des données

– Mode faible consommation pour les ports

Quand aucun lien n'est détecté sur un port, le port réduira immédiatement son alimentation pour économiser de l'énergie

– Ventilateurs

Vitesse variable des ventilateurs qui permet de réduire la consommation d'énergie (tous les switches 8 ports, 2530-24 et 2530-48)

– Port LEDs

Les LEDs associées aux ports peuvent être éteintes pour réduire la consommation d'énergie

• Commutateur dans une puce

Fournit un commutateur fortement intégré, de haute performance avec une architecture non bloquante

Flexibilité

• Montage flexible

– Rackable

Peut être monté sur un rack 19 pouces à l'aide du matériel inclus

– Montable au mur

Permet au commutateur d'être installé à un mur grâce au

matériel fourni

– Montable sur une surface

Permet à un commutateur d'être monté au-dessus ou en dessous d'une surface (tel qu'un bureau ou une table) grâce au matériel fourni

• Fonctionnement silencieux

Vitesse variable du ventilateur pour s'adapter à son fonctionnement en diminuant le bruit et la consommation d'énergie

Garantie et support

• Garantie à vie

Durant toute la durée de vie du produit avec un remplacement du produit et livraison le jour ouvrable suivant (disponible dans la plupart des pays)*

• Support technique et téléphonique

Un support téléphonique et technique limité est disponible chez HP, pour joindre un centre de support cliquez sur www.hp.com/networking/contact-support ;

Pour obtenir des détails sur la durée du support fourni avec l'achat de notre produit, consultez : www.hp.com/networking/warrantysummary

• Logiciel

Pour trouver des logiciels pour vos produits, consultez www.hp.com/networking/support ; pour des détails sur la disponibilité des logiciels compatibles avec votre produit acheté, consultez www.hp.com/networking/warrantysummary

*La garantie HP comprend la réparation ou le remplacement du produits tant que vous le possédez, remplacement anticipé le jour ouvré suivant (disponible dans la plupart des pays). Pour plus de détails, merci de consulter www.hp.com/networking/warranty.

Gamme de switches HP 2530

Caractéristiques

	Switch HP 2530-48G-PoE+ (J9772A)	Switch HP 2530-24G-PoE+ (J9773A)	Switch HP 2530-8G-PoE+ (J9774A)
Ports	48 RJ-45 autosensing 10/100/1000 PoE+ ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T, IEEE 802.3at PoE+); Media Type: Auto-MDIX; Duplex: 10BASE-T/100BASE-TX: half or full; 1000BASE-T: full only 4 fixed Gigabit Ethernet SFP ports 1 dual-personality (RJ-45 or USB micro-B) serial console port	24 RJ-45 autosensing 10/100/1000 PoE+ ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T, IEEE 802.3at PoE+); Media Type: Auto-MDIX; Duplex: 10BASE-T/100BASE-TX: half or full; 1000BASE-T: full only 4 fixed Gigabit Ethernet SFP ports 1 dual-personality (RJ-45 or USB micro-B) serial console port	8 RJ-45 autosensing 10/100/1000 PoE+ ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T, IEEE 802.3at PoE+); Media Type: Auto-MDIX; Duplex: 10BASE-T/100BASE-TX: half or full; 1000BASE-T: full only 2 dual-personality ports; each port can be used as either an RJ-45 10/100/1000 port (IEEE 802.3 Type 10Base-T; IEEE 802.3u Type 100Base-Tx; IEEE 802.3ab 1000Base-T Gigabit Ethernet) or as a SFP slot (for use with SFP transceivers) 1 dual-personality (RJ-45 or USB micro-B) serial console port
